

# Environment Guidelines DISC Series

**For optimum functioning of a DISC Series Library, the following operating conditions and guidelines apply:**

## Operating Conditions

- Ambient temperature (external): 10°C-40°C / 50°F-104°F  
Gradient of temperature (external): 11°C/h or 51.8°F/h
- Relative humidity : 10%-75% non-condensing

## Guidelines

- The DISC Series Libraries are intended for use in an office or data centre environments.
- When placing the Optical Library avoid places with:
  - dust (e.g. printer/photocopier room)
  - extreme temperatures
  - excessive sun exposure
  - high humidity levels
  - contact with water
  - contact with chemicals
  - extreme vibration
- Do not remove the side covers of the library (also to ensure warranty coverage).
- The right location has:
  - stable, even support
  - sufficient space to pull out and service the unit
- All DISC Optical Libraries are equipped with a fan and an air filter for the cooling air flow and prevention of incoming dust. Do not cover the air intake grill. The air filter should be checked for dust pollution at least every 6 months. If the 'Temperature' or 'FAN' alarm is displayed, please check and if necessary clean or replace the air filter at the right hand cabinet side.
