Product Brief Rimage Professional™ Series

A powerful in-house solution

Rimage Professional 5400N and 3400 systems are high-performance, front-office solutions for automatically copying and creating CDs, DVDs and Blu-ray Discs™ with customized digital content and direct-to-disc printing. Your business will benefit from a fully automated and intelligent in-house digital publishing solution with a low, long-term cost of ownership.

Benefits

Small footprint

The 5400N and 3400 systems are designed to tuck into tight spaces. Fewer cables and connections mean increased data throughput, faster disc production and a reduced overall footprint.

Professional 3400

Professional 5400N

Network connectivity

With an Ethernet connection, the networked 5400N system is as simple to use as a printer or copier. The standalone 3400 system can be easily networked using an external PC and Rimage's Network Software Suite.

Integrated printer

Rimage's Everest[™] 400 printer is the market's only fully integrated 400 dpi printer, providing indelible, high-resolution images and sharp, easy-to-read text.

Unmatched performance

The three-bin carousel enables three media types to run concurrently. Publish up to 18 full DVD-Rs (4.7 GB) and 30 full CD-Rs (700 MB) per hour with hands-free operation.

Features

Backed by Rimage's decades of experience in designing and building hardware, the Professional Series standard features include:

- Two quick-release recorders
- LCD status display
- Rotating three-bin 150-disc carousel for input/output
- External five-disc output bin
- Integrated Everest 400 thermal retransfer printer
- Front USB port (5400N only)

Options

- Combinations of CD/ DVD and Blu-ray recorders
- Network Software Suite (NSS) for the 3400 (included with the 5400N)

Blu-ray Disc[™] is a trademark of the Blu-ray Disc Association.
