Revolution Radiation Protection

With the Revolution line, we have re-imagined all aspects of current radiation protection products. Every product in the Revolution line has been built from the ground up to blend style, comfort and protection. The Revolution line is designed to take radiation protection to the highest level.

Revolution Fabric

Every Revolution Apron, Thinking Cap and Thyroid collar is manufactured with our exclusive Revolution Fabric. This is the most comfortable fabric you have ever felt on a protective apron. Revolution Fabric is exclusive to Infab and the Revolution line and is lightweight, waterproof, abrasion resistant, flame resistant, bacterial resistant and incredibly soft. We currently offer seven different color options, all of which have been custom created for the Revolution line.

Color Options

Revolution Aprons are exclusively available in seven color-blocked options.

INFAB
Corporation

 **REVOLUTION**

Color Blocking

Every Revolution Apron has been designed with an eye-pleasing, 2-tone color blocked design.

Female

U.S. Sizing (Inches)

	X-Small	Small	Medium	Large	X-Large	XX-Large

Waist	68-76	78-86	88-96	99-106	109-116

Sizing

Every Revolution apron has been redesigned from the ground up to make sizing simple and accurate. Infab teamed up with a professional pattern maker to create the best fitting aprons in the industry, eliminating the need for custom sizing. This new and accurate sizing makes it easy to order a Revolution Apron. If your measurements are correct as per the chart, the apron will fit properly and be the most comfortable you have ever worn.

Sizing Only Accurate for Revolution Style Aprons

Protection

Revolution Aprons are offered in our Three Smart Armor Core Material Options: Regular Lead, Lightweight Composite and Greenlite, as well as the all-new KIARMOR Bi-Layer protection.

Design

Vest

Partial Overlap

The Revolution Vest has been produced with a partial overlap closure to increase protection. Each panel contains your choice of .25 mm, .35 mm or .50 mm Lead equivalency and does not rely on overlap to achieve these results. This new design provides complete protection for your entire upper body.

Unless otherwise specified, our standard configuration is .5 mm Pb in each front panel and .25 mm Pb in the back panel.

“Back Flap” Design

Revolution vests feature our all new “Back Flap” design, providing extra protection when bending at the waist as well as balancing out the weight of the apron front to back for increased comfort.

Skirt

Built in “Black Belt”

Revolution Skirts have been designed with a built in orthopedic elastic “Black Belt”. This added support relieves weight on the lower back and provides a superior fit for the skirt. The skirt waist is now adjustable depending on how much support you like on your lower back. The built in “Black Belt” also stops the skirt from slipping down the waist which provides a much more comfortable and secure fit while completely eliminating the need for aids like suspenders or hot and uncomfortable “non-slip” materials.

Unless otherwise specified, our standard configuration is .5 mm Pb in each front panel and .25 mm Pb in the back panel.

Revolution Vest & Skirt

Revolution Vest and Skirts seamlessly blend the most sought-after and effective apron features and benefits to create a truly groundbreaking product.

Revolution Vest & Skirt

Revolution Vest & Skirts are completely redesigned to offer the best X-ray protection apron on the market.

- Exclusive Revolution outer material
- “Back Flap” for better weight support
- Built-in “Black Belt” for better lumbar support
- Partial overlap to increase protection
- Two-tone color blocking
- Every Revolution Apron comes with Cool Wear Moisture-Wicking fabric
- Professionally designed for an exceptional fit and comfort

Revolution Full Wrap Black Belt™

The Revolution Full Wrap Black Belt is complete front and back radiation protection in a one piece garment. Easy to put on and take off and with the added comfort of a fully adjustable six inch wide orthopedic elastic belt for lower back support and weight relief off the shoulders. Partial overlap design with .5 mm lead equivalency in each front panel offers maximum protection and eliminates areas of lower protection in the upper chest and shoulder area which are common to the full overlap type aprons.

Revolution Full Wrap Black Belt™

- Exclusive Revolution outer material
- Partial overlap to increase protection
- Two-tone color blocking
- Every Revolution Apron comes with Cool Wear Moisture-Wicking fabric
- Professionally designed for an exceptional fit and comfort

Accessories

The Revolution Accessory line offers the best accessories available in radiation protection.

Revolution Thyroid Collar

The completely redesigned Revolution Thyroid Collar is the only Thyroid Collar on the market today that truly protects all areas, front and back, while offering the best comfort for the user thanks to the Cool Wear liner.

Revolution Thinking Cap

The Revolution Thinking Cap has been designed to offer the user a more comfortable fit with the all-new Elastic Back closure.

Revolution Apron Sleeves

Finally, the Revolution Apron Sleeves have been designed with convenience, comfort and protection in mind. No longer do sleeve add-ons require difficult to use snaps; simply attach the Revolution Apron Sleeves to your existing radiation protection Apron or get additional protection with the Revolution Attached Thyroid Collar Sleeves.

For maximum protection,
put on the Thyroid Collar prior
to the apron

Revolution Scrubbles RX

With a new fresh scent, Revolution Scrubbles RX is the best way to keep your products and work area completely sterilized. Revolution Scrubbles RX keeps your aprons and surfaces completely disinfected, but will not harm apron fabrics or other surfaces. Scrubbles RX helps keep hospital surfaces clean and sterile.

Revolution Scrubbles RX

Revolution Scrubbles RX is a one-step hospital-use germicidal disinfectant cleaner and deodorant designed for general cleaning, disinfecting, deodorizing, and controlling mold and mildew on hard, non-porous inanimate surfaces. Quickly removes dirt, grime, mold, mildew, food residue, blood and other organic matter commonly found in hospitals. It also eliminates odors, leaving surfaces smelling clean and fresh.
